- Motivates you to venture outside your comfort zone

## DESCRIBE A TYPICAL CLASS

Thirty minutes of Les Mills CXWORX<sup>®</sup> is all you'll need to give your core a challenging workout that features a mix of isolation exercises (like crunches or leg extensions) that target specific muscles and integrated moves that use two or more muscle groups together.

### 1. WARMUP

Connects you with your core muscles and teaches you how to engage these muscles.

### 2. CORE STRENGTH 1

Increases the challenge on your lower and upper abs, and begins activating your muscular slings.

### 3. STANDING STRENGTH 1

Trains your glutes, abs and sling muscles in standing, and improves your awareness of how these muscles function in daily activities.

### 4. STANDING STRENGTH 2

Increases the demands on your glutes, using squat and hip pulse moves.

### 5. CORE STRENGTH 2

Trains your obliques in three patterns of movement – laying twists, side hovers and mountain climbers in a plank position. This is “superset” core training.

### 6. CORE STRENGTH 3

Brings your focus to the back muscles to improve trunk extension.
