Construction Update: Thank You for Your Patience & Flexibility

10.2.26

Dear YMCA Members,

As our facility transformation continues, I want to take a moment to simply say thank you.

Construction of this scale comes with dust, temporary walls, changing traffic patterns, equipment moves, schedule adjustments, occasional closures, and plenty of moments when things may not look quite as polished as we would like. Through it all, you have continued to show tremendous patience, flexibility, and understanding.

Thank you for looking past the construction mess and focusing on what we are building together. Thank you for adapting when programs have needed to move, when spaces have temporarily closed, and when schedules have changed. Most importantly, thank you for continuing to make the YMCA part of your daily lives while we work to create an even better experience for our members and community.

We have made significant progress, and there is much more taking shape behind the construction walls.

FAMILY GYM UPDATE

Fireproofing work in the Family Gym is expected to wrap up this Saturday. Beginning next week, crews will move into approximately two weeks of applying intumescent paint as part of the fire protection system.

During this phase, members may notice a stronger paint or construction-related odor in and around portions of the facility. We want to make you aware ahead of time so you know what to expect. We will continue working with our construction team to minimize the impact whenever possible.

WELLNESS CENTER VERTICAL EXPANSION

Our Wellness Center expansion continues to take shape, and we are excited to see the new space becoming a reality. This expanded area will ultimately house our cardio equipment, creating additional room throughout the Wellness Center for strength equipment, functional fitness, and an improved overall member experience.

We've included renderings so you can get a better look at where we are headed.

NEW WELLNESS EQUIPMENT COMING IN NOVEMBER

We are also preparing for the arrival of new fitness equipment, currently expected mid-to-late November. A list of what is coming is below.

As we prepare for delivery and installation, there will likely be some movement and rearranging of existing equipment throughout the Wellness Center. At times, certain pieces of equipment or small areas may be temporarily unavailable while we make these transitions.

We will communicate any temporary impacts as early as possible and do everything we can to maintain access to the equipment and spaces you rely on.

Every temporary wall, closure, and construction inconvenience is helping us move closer to the YMCA we have envisioned for our members and our community.

We know construction can test everyone's patience, and we do not take your understanding for granted. Thank you for continuing to support the Fond du Lac Family YMCA, for adapting alongside us, and for sharing in the excitement of what is ahead.

We are getting closer every day, and we cannot wait for you to experience the finished spaces.

With gratitude,

JJ Raflik
CEO/Executive Director
